**Subject:** FW: New Central Sands Lakes Study Website

Not sure if there will be anything on the Central Sands water resource webpage that can help you with your actions against Central Sands Dairy but thought I would share this email just in case.

You are receiving this communication because of your past interest in the DNR's Central Sands Strategic Analysis. The recent enactment of 2017 Wisconsin Act 10 has provided the DNR with a new focus for the study of water management in the Central Sands. This new effort, the Central Sands Lakes Study (CSLS), will model and evaluate specific water resources within the region.

Over the four year study period, information regarding the CSLS and topics related to water resources management in the Central Sands will be housed on the newly-created CSLS [webpage](#).

DNR will use GovDelivery as a communication tool for the CSLS. If you were previously receiving GovDelivery updates on the Central Sands Strategic Analysis, you have been automatically signed up to receive information for the CSLS topic. If you do not wish to receive information regarding the CSLS, you can click on the "Manage Your DNR Subscriptions" link below.
